GRYPHON™ I 4100-HC SERIES

GENERAL PURPOSE HANDHELD LINEAR IMAGER BAR CODE READERS FOR THE HEALTHCARE INDUSTRY

The key mission of scanners in the healthcare industry is to improve the quality of patient care while reducing medication errors. Additionally, healthcare environments have requirements that scanners need to be regularly cleaned and disinfected using harsh cleaning solutions. Datalogic ADC's Gryphon HC product series is specifically developed for healthcare applications with Disinfectant-Ready enclosures treated with anti-microbial additives designed to withstand daily cleaning with disinfectant solutions.

Gryphon HC readers provide unmatched flexibility offering healthcare professionals the complete suite of reading and radio technologies available within the Gryphon series. From corded models to standard Bluetooth® wireless technology or to the powerful Datalogic STAR narrow-band radio, Gryphon HC readers offer customers the widest variety of products and radio choices with disinfectant-ready enclosures.

In healthcare environments where mobility is not needed, the GD4100-HC reader offers an affordable corded solution, while the GM4100-HC or GBT4100-HC models (STAR or Bluetooth) provide full installation flexibility and extended mobility for cordless operations. A patented 2-position cradle provides functional and reduced space requirements. The GM4100-HC model is equipped with Datalogic's STAR Cordless System™ providing bi-directional communication and an optional display with a 3-button keypad that adds real-time battery status, radio coverage indicator and enables operator interaction with the host system.

The Gryphon HC models have an industry sealing rating of IP52 to protect sensitive electronic components from contact with dust and liquids. Products withstand repeated drops from 1.5 m / 5.0 ft to ensure uninterrupted activity despite the inevitable accidental drops and rough handling.

All Gryphon HC readers include the patented Datalogic 'Green Spot' for good read/perfect match feedback, ideal for quiet environments such as bedside patient care where the perfect match can offer a simple additional tool to avoid errors.
