☒ Output (CR) flag at the end of the package

Information:

Set Device Set Default EXIT

Two working modes:

1.auto output: don't use any software. just swipe the magnetic card or put rf-card to the induction fields, data will show at the mouse cursor.

2.shut down the "Mag Card Auto-read" and "RFID Auto-Read" click "Set device", open the software, if showed succeed means the device and computer have connected.
